METAL FENCING
PRODUCT INFORMATION

NZ MADE AND TESTED TO
PERFORM TO NZ SEVERE
WIND CONDITIONS.

AZTEC Profile
New Zealand Wide

SELECTING THE RIGHT FENCE

Selecting the right fence for your environment is important. All fencing needs to be designed to withstand the wind conditions at the site where the fence is to be erected.

The wind load on your fence at your site will depend on a number of factors, including where you live, where the fence is to be installed and the number of surrounding properties.

For more information please download the following brochures from www.metalcraftroofing.co.nz

- Product design guide
- Warranty and maintenance brochure
- Installation guide
- Determining your wind zone to NZS 3604:2011.

PROFILE OPTIONS

AZTEC PROFILE NEW ZEALAND WIDE

Aztec has strong defined lines. The Aztec profile has a raised five rib trapezoid form on one side, and a flat aspect on the other.

KAHU® PROFILE SOUTH ISLAND ONLY

A contemporary look with strong defined shadow lines. The Kahu® profile has a high rib symmetrical profile which looks great from either side of the fence.

Dimensions are nominal and may vary. Check with your nearest Metalcraft Fencing manufacturing branch for profile dimensions. Please note the above AZTEC profile and dimensions might also vary depending on manufacturing location, to confirm your local Aztec profile please check with your Metalcraft Fencing manufacturing branch.

VERSATILE

Metal fencing provides you with greater versatility and can be used as infill panels between block or brick columns. Metalcraft Fencing can be installed in both flat and sloping sites, please consult your nearest Metalcraft Fencing manufacturing branch for actual site limitations.

COLORSTEEL®

Metalcraft Fencing panels are manufactured from locally sourced steel from New Zealand Steel in COLORSTEEL® ENDURA®. The G550 high tensile steel is strong, robust, durable and low in maintenance.

PEACE OF MIND

Metalcraft Fencing has no toe holds, this makes it harder to climb up giving you more peace of mind.

DURABLE

Metalcraft Fencing offers the longevity and durability of steel and saves you the trouble of post painting.

Contact your local Metalcraft Fencing manufacturing branch for a free quote.

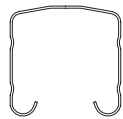

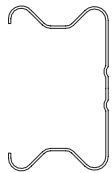

POST AND RAILS

An innovative roll formed post and rail system offers the dual benefit of strength and ease of installation. A key advantage of this fencing system is that our steel posts and rails are robust enough to eliminate the need for any intermediate rails, affording clean lines and a tidy look on both sides of the fence.

The post and rails are available as standard in the same colours as the fence. If you want you can also request post and rails in another complementary colour to the metal fence panels. Refer to the 6 stocked colours for options.

POST
0.95BMT G550 STEEL

RAIL
0.75 BMT G550 STEEL

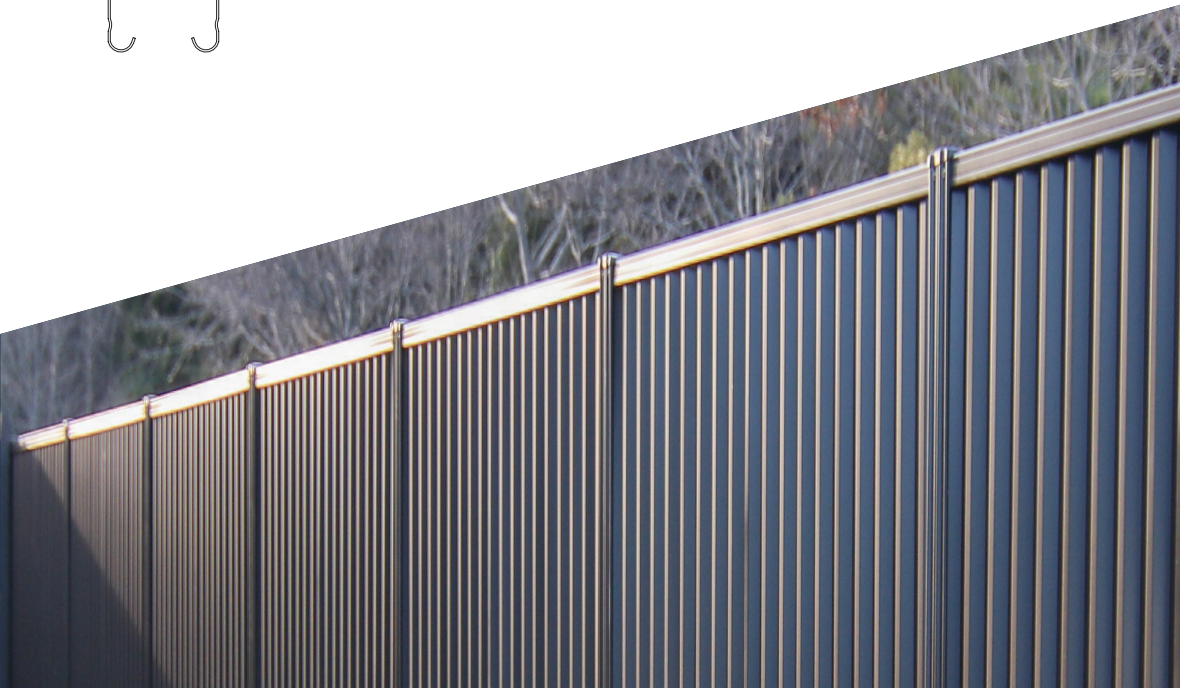

RANGE OF GATES

Metalcraft Roofing has a range of gates to complement the standard range of Metalcraft fencing and accessories. Please contact your local Metalcraft Fencing manufacturing branch for more information.

KAHU® Profile
South Island only

COLOURS

COLOURS

Metalcraft Fencing is available in 6 popular double sided colours made from New Zealand Steel in COLORSTEEL® ENDURA®. For non-stocked colours please check availability and minimum order quantities with your local Metalcraft Fencing manufacturing branch.

We strongly recommend checking your chosen colour against an actual sample of the product before purchasing as varying light conditions and limitations of the printing process will affect colour tones. These can be obtained from your nearest Metalcraft Fencing manufacturing branch.

Post and rails are available as standard in the same colours as the fence. If you want you can also request post and rails in another complementary colour to the metal fence panels.

GREY FRIARS

TITANIA

IRONSAND

FLAXPOD®

TEMPEST (EBONY)

THUNDER GREY
